# THE NEXT EXPERIMENT

## MANUAL AND PUZZLE GUIDE

The Next Experiment is an escape game where you play as a character trying to break out of a scientist castle. This thrilling puzzle game will have you traversing through different rooms to collect items and solve puzzles as you try to escape before time runs out!

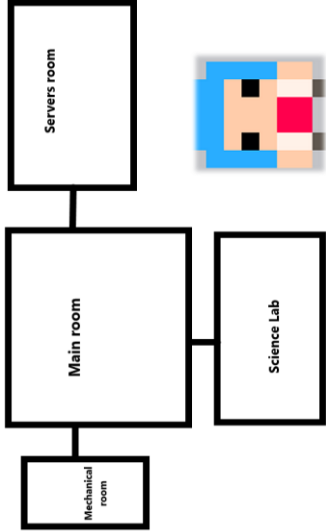

Explore the castle, grabbing useful items and solving the various puzzles throughout the rooms. There will be puzzles that involve interacting with different collectibles and objects within the rooms. Your goal is to ultimately utilize your wits and problem-solving skills in order to escape from the mad scientist.

Goal:

To be able to escape you must solve puzzles to collect door panels. When you have all four door panels, you will be able to unlock the large door in the Main room and leave. You will have an 18-minute count down timer.

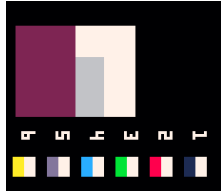

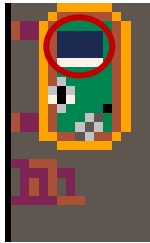

Controls:

### Puzzle Solutions

To get the flowers to bloom, you will need to go into the servers room. Once in the room, pick up the jug and take it over to the sink to fill it. Take the full jug into the main room and interact with the flowers. They will bloom when you use the water jug on the flowers.

To reveal the stairs, grab the book off the desk. Interact with the bookshelf and use the book on it. Once you reveal the stairs the chemistry puzzle will be available in the lab.

The mirror is a part of a puzzle in another room, the bookshelf when solved will reveal a set of stairs, and when the flowers bloom you will receive another door panel.

Moving on to the servers room, this will help you make the flowers bloom. Make sure to explore this room carefully.

Once you have revealed the stairs, go down them to head into the science lab. Here it is crucial to read everything carefully. Make yourself a dark purple friend and use its properties to make a mess in the mechanical room to reveal another door panel.

Once you have collected all four door panels, interact with the door in the main room to unlock it and escape.

(For more details on how to solve all the puzzles, go to pages 5 and 6)

### Walkthrough

There are 4 rooms for you to explore, the main room, the mechanical room, the science lab and the servers room.

You start out in the dark main room and must navigate to the mechanical room.

Take note of the oven in the corner. find the electrical panel to reveal the first puzzle.

Once solved the lights will be restored and you will be given your first door panel. You will need to collect all 4 door panels to be able to unlock the door and escape.

Next, you will want to walk back into the main room and start exploring. There are 3 major items to note in this room. The bookshelf, the wilting flowers, and the mirror. These items are a part of puzzles that you will need to solve to get the rest of the door panels.
